Art Unit: 2871

#### **DETAILED ACTION**

1. This application is in condition for allowance except for the following formal matters:

#### **Drawings**

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the claimed limitation of "wherein a portion of said black matrix is located opposite a data line of said plurality of data lines and has a width that is less than a width of said data line and that is at least slightly larger than a width of a slit in a portion of said common electrode that is overlapping said data line; and wherein said first conductive film has a width that is at least larger than a width of said portion of said black matrix" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet"

Application/Control Number: 10/800,738

Art Unit: 2871

pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## Allowable Subject Matter

- 3. Claims 1-3 and 5-7 allowed.
- 4. The following is an examiner's statement of reasons for allowance: The prior art or record, taken alone or in combination, fails to teach or disclose in light of the specifications, claim 1) an active matrix type liquid crystal display device comprising a first conductive film provided on the flattening film so as to oppose the data lines via the slits, the first conductive film being set to a common electric potential with the common electrode; wherein the first conductive film overlaps the portions of the common electrode where the slits are formed; wherein the first conductive film has a width that is at least larger than a width of the portion of the black matrix; claim 5) a method of manufacturing an active matrix type liquid crystal display device, the method comprising forming a first conductive film on the flattening film, the first conductive film opposing the date lines via the slits; wherein the first conductive film overlaps the portions of the common electrode where the slits are formed; wherein the first conductive film has a width that is at least larger than a width of the portion of the black matrix.

The first conductive film (37) of Choi et al. is clearly shorter in width than the black matrix. Furthermore, in regard to the claim language "portions of the black matrix", in light of the specifications, Examiner has interpreted its meaning to be an entire segment of the black matrix as illustrated in Figure 12 as 209a.

Application/Control Number: 10/800,738 Page 4

Art Unit: 2871

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard H. Kim whose telephone number is (571)272-2294. The examiner can normally be reached on 9:00-6:30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Nelms can be reached on (571)272-1787. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <a href="http://pair-direct.uspto.gov">http://pair-direct.uspto.gov</a>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
